Cellular and Molecular Neurobiology—Volume 15, 1995

Cellular and Molecular Neurobiology publishes original research articles concerned with the analysis of neuronal and brain function at the cellular or subcellular levels. The journal welcomes articles utilizing anatomic, genetic, physiologic, pharmacologic, or biochemical approaches to the study of neuronal function and oriented to the analysis of elementary mechanisms. Studies of isolated mammalian tissues, and intact animals, with investigation aimed at the molecular mechanisms or neuronal responses at the level of single cells, are accepted for publication. The journal also presents studies of the effects of neurons on other organ systems, such as analysis of the electrical or biochemical response to neurotransmitters or neurohormones on smooth muscle or gland cells.

Cover: Pyramidal cell neuron filled with horseradish peroxidase from the cortex of cat. Courtesy of Dr. Charles D. Woody.

EDITOR

Juan M. Saavedra, National Institute of Mental Health, Bethesda, Maryland

ASSOCIATE EDITORS

Masami Niwa, Nagasaki University School of Medicine, Nagasaki, Japan

Hermona Soreq, The Hebrew University of Jerusalem, Jerusalem, Israel

EDITORIAL ADVISORS

Julius Axelrod, National Institute of Mental Health, Bethesda, Maryland

David O. Carpenter, New York State Department of Health, Albany, New York

Marshall Nirenberg, National Institutes of Health, Bethesda, Maryland

EDITORIAL BOARD

Cellular Neurobiology

Edson X. Albuquerque, University of Maryland, Baltimore, Maryland
Hugo Arechiga, Instituto Politecnico National, Mexico City, Mexico
Mary A. Bittner, University of Michigan Medical School, Ann Arbor, Michigan
J. Edwin Blalock, University of Alabama, Birmingham, Alabama
David A. Brown, University College London, London, England
Alejandro De Nicola, Institute of Biology and Experimental Medicine, Buenos Aires, Argentina
Peter W. Gage, Australian National University, Canberra, Australia
Helmut L. Haas, Heinrich-Heine-Universität, Dusseldorf, Germany
Thomas K. Hughes, Jr., University of Texas Medical Branch, Galveston, Texas
Boris Khorodov, Vishnevsky Surgery Institute, Moscow, Russia
Konosuke Kumakura, Sophia University, Tokyo, Japan
Andrea Levi, Istituto di Neurobiologica, Rome, Italy
Giulio Levi, Istituto Superiore di Sanita, Rome, Italy
Carlos Libertun, Institute of Biology and Experimental Medicine, Buenos Aires, Argentina

CONTENTS

Special Issue: The Gonadotrophin Releasing Hormone Neuron

Guest Editor: Carlos Libertun

Introduction 1
Carlos Libertun

Evolutionary Aspects of Gonadotropin-Releasing Hormone and Its Receptor 5
Judy A. King and Robert P. Millar

Functional Domains of the Gonadotropin-Releasing Hormone Receptor 25
Stuart C. Sealfon and Robert P. Millar

Immortalized Hypothalamic Luteinizing Hormone-Releasing Hormone (LHRH) Neurons: A New Tool for Dissecting the Molecular and Cellular Basis of LHRH Physiology 43
William C. Wetsel

Regulation of Gonadotropin-Releasing Hormone (GnRH) Gene Expression in Hypothalamic Neuronal Cells 79
Margaret E. Wierman, Jan M. Bruder, and Jadwiga K. Kepa

Dynamic Alterations in Luteinizing Hormone-Releasing Hormone (LHRH) Neuronal Cell Bodies and Terminals of Adult Rats 89
J. C. King and B. S. Rubin

Genes and Behavior as Studied Through Gonadotropin-Releasing Hormone (GnRH) Neurons: Comparative and Functional Aspects 107
I. Parhar, D. Pfaff, and M. Schwanzel-Fukuda

Amplitude and Frequency Modulation of Pulsatile Luteinizing Hormone-Releasing Hormone Release 117
Jon E. Levine, Patrick Chappell, Leslie M. Besecke, Angela C. Bauer-Dantoin, Andrew M. Wolfe, Tarja Porkka-Heiskanen, and Janice H. Urban

Control of Luteinizing Hormone-Releasing Hormone Pulse Generation in Nonhuman Primates 141
Ei Terasawa

Development of Gonadotropin-Releasing Hormone (GnRH) Neuron Regulation in the Female Rat 165
Damasia Becú-Villalobos and Carlos Libertun
